

We are hiring! – PhD and Postdoc positions

The [Graphics & Imaging Lab](#), a research group within the [I3A Research Institute](#) at [Universidad de Zaragoza](#) (Spain), is looking for motivated researchers to work within the project “**IMMERSENSE - Computational Modeling of Multimodal Perception in Virtual Reality**”.

The **goal of the project** is to study, understand, and computationally model perceptual and cognitive aspects in multimodal virtual environments, considering not only visual input but also other sensory modalities such as hearing and touch. These models can in turn be leveraged by researchers and practitioners when designing new experiences and developing future algorithms, visualization techniques, and novel hardware.

We are looking for motivated candidates with a background in Computer Science or related areas, both for PhD and Postdoc funded positions. Candidates should hold an MSc or be in a position to hold it by the end of 2023.

We offer the opportunity to carry out cutting-edge research at a research lab with an excellent track record and a fantastic working environment.

Interested candidates should contact [Belen Masia \(bmasia@unizar.es\)](mailto:bmasia@unizar.es) and [Ana Serrano \(anase@unizar.es\)](mailto:anase@unizar.es) by **October 2nd, 2023**, and provide the following information (email subject: “IMMERSENSE - Application”):

- Curriculum vitae
- Transcript of records
- Letter of motivation
